Profile Summary

Final-year Artificial Intelligence and Machine Learning Engineering student with strong knowledge of AI/ML technologies, backend development, and MERN full-stack development. Experienced in building applications using Java, Node.js, Express.js, React.js, MongoDB, and SQL, with a strong foundation in DSA and problem-solving. Participated in various hackathons and technical events, with a keen interest in building scalable, real-world software solutions.

Achievements

- Participated in International PICT INC - 25 Hackathon at PICT College of Engineering.
- Participated in HCL International Hackathon and made Text Speech AI Model.
- Member of College coding club and active involvement in many Cloud and AI Community.
- Various Certificates from Top companies like McKinsey, Oracle, TCS in leading technologies.

Projects

AI-Powered Interview Preparation Platform | React.js, Node.js, MongoDB, Generative AI — July 2026 – Present

- Developed an AI-powered interview platform using the MERN stack for personalized interview preparation.
- Implemented resume upload and AI-based analysis to generate tailored technical and HR interview questions.
- Built an interactive interview and feedback system with performance reports and interview history.
- GitHub Link

Room Finder | Javascript, ReactJS, NodeJs, ExpressJs, MongoDB, TailwindCSS — July 2026 – Present

- Designed and developed a full-stack room finder application using the MERN stack.
- Implemented secure user authentication and authorization for posting and managing listings.
- Created a dynamic frontend with React for a seamless user experience.
- Github Link

Forkify App | Python, Flask, React.js, MySQL — July 2026

- Developed a responsive recipe application using JavaScript, HTML, and CSS, integrating a recipe API for dynamic data..
- Implemented MVC architecture with modular models, views, controllers, and event-driven functionality.
- Added recipe search, pagination, serving adjustment, bookmarks, and localStorage features for an interactive user experience.
- Github Link

Experience

Software Engineer Intern — Aug 2026 – Present
Vianera — Pune, India

- Architected and deployed full-stack analytics dashboard using React.js and Node.js, implementing optimized component rendering and state management patterns, achieving 30% performance improvement in page load times
- Designed and optimized RESTful API endpoints with Express.js for real-time product data fetching, implementing efficient caching strategies and pagination to ensure continuous dashboard availability.
- Collaborated with the AI team to integrate a customer support chatbot.

Technical Skills

Languages & Frameworks: Python, JavaScript, React.js, FastAPI, Flask, Node.js, Express.js, HTML, CSS, SQL
AI/ML Technologies: RAG Systems, HuggingFace, LLM Integration, Vector Embeddings
Databases & Storage: MongoDB, MySQL, Postgresql
Tools & Platforms: AWS, Docker, Git, Github, Postman
Core Competencies: Full-Stack Development, Microservices, API, Data Structures & Algorithms

Education

Navsahyadri College of Engineering, Pune — Pune, India
B.E in Artificial Intelligence and Machine Learning. — Aug 2023 – Present
Don Bosco High School and Junior College — Nashik, India
SSC – 92.20% HSC – 65% — 2021 – 2023
